

Meta Ads Launch Checklist

Set up and launch profitable Facebook/Instagram ads.

Before you launch

- Install the Meta Pixel + Conversions API on your store.
- Verify your domain and configure the 8 conversion events (Purchase = priority 1).
- Set up a Business Manager, ad account, and payment method.
- Have 3-5 video creatives ready (hook in first 3 seconds).

Campaign structure

- Objective: Sales / Conversions (optimize for Purchase).
- Start with 1 CBO campaign, 3-5 ad sets, \$20-30/day each.
- Test different interests / broad / lookalikes per ad set.
- 1-3 ads per ad set; let Meta find the winner.

Metrics & rules

- Aim: CTR 2%+, CPC under \$1.50, CPM under \$20.
- CPA must stay under 30% of your AOV.
- ROAS 2.5x+ to be profitable (know your break-even ROAS).
- Kill an ad set after it spends 2x your target CPA with no sale.

Scaling

- Duplicate winners and raise budgets ~20% every 2-3 days (avoid big jumps).
- Build lookalikes (1%, 2%, 5%) from purchasers once you have 50+ buyers.
- Refresh creatives before fatigue (watch frequency > 2).

Not legal/tax advice. Verify current rates and rules for your situation.
